DETAILED ACTION

Status of Claims

1. Claims 1-33 are pending.
2. Claims 1, 2, 4, 6-8, 11, 12, 22, and 23 are elected and rejected.
3. Claims 3, 5, 9, 10, 13-21, and 24-33 are non-elected and withdrawn from consideration as per the Response to the Restriction Requirement of October 9, 2003.

Election/Restrictions

4. Applicant's election with traverse of Group II in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the groups are not restrictable. This is not found persuasive because the different methods of treating bladder infections and overactive bladder have different effects than treating spinal cord injuries, MS or stroke. However, the number of claims has been expanded from claims 8, 12, and 23 to include the following claims 1, 2, 4, 6-8, 11, 12, 22, and 23 but only in so far as they embrace methods of treating spinal cord injury.
5. The requirement is still deemed proper and is therefore made FINAL.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in

Art Unit: 1614

upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) **BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).**
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1614

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 1, 2, 4, 6-8, 11, 12, 22, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Effland et al. of U.S. Patent No. 4,880,822. Effland et al. teach of the N-(pyridinyl)-1H-indol-1-amine compounds of formula I. In addition, Effland et al. disclose that these compounds are used as inter alia, analgesic agents, (see abstract and claim 53). Since pain is associated with an injury, such as a spinal cord injury, the skilled artisan would have been motivated to administer the compounds of Effland et al. to treat injuries of the spinal cord. It would have been obvious to one having ordinary

Art Unit: 1614

skill in the art to employ the well-known compounds of Effland et al. to treat spinal cord injuries especially since pain would be involved.

Obviousness-type Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1, 2, 4, 6-8, 11, 12, 22, and 23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 53 of Effland et al. of U.S. Patent No. U.S. Patent No. 4,880,822. Although the conflicting claims are not identical, they are not patentably distinct from each other because . Effland et al. teach of the N-(pyridinyl)-1H-indol-1-amine compounds of formula I. In addition, Effland et al. disclose that these compounds are used as inter alia, analgesic agents, (see abstract and claim 53). Since pain is associated with an injury, such as a spinal cord injury, the skilled artisan would have been motivated to administer the compounds of Effland et al. to treat injuries of the spinal cord. It would have been obvious to one having ordinary skill in the art to employ the well-known

Art Unit: 1614

compounds of Effland et al. to treat spinal cord injuries especially since pain would be involved..
